Unlock the power of solar EV charging

Did you know EV drivers are more likely to have a solar installation at home?

Give them the charging solution they needwith Wallbox.

Harnesses the full power of the PV

Users can take full advantage of their surplus green energy by directing it to their EV for charging.

Includes two modes for greater control

Users have the flexibility to charge with 100% solar energy or a mix of solar and grid energy.

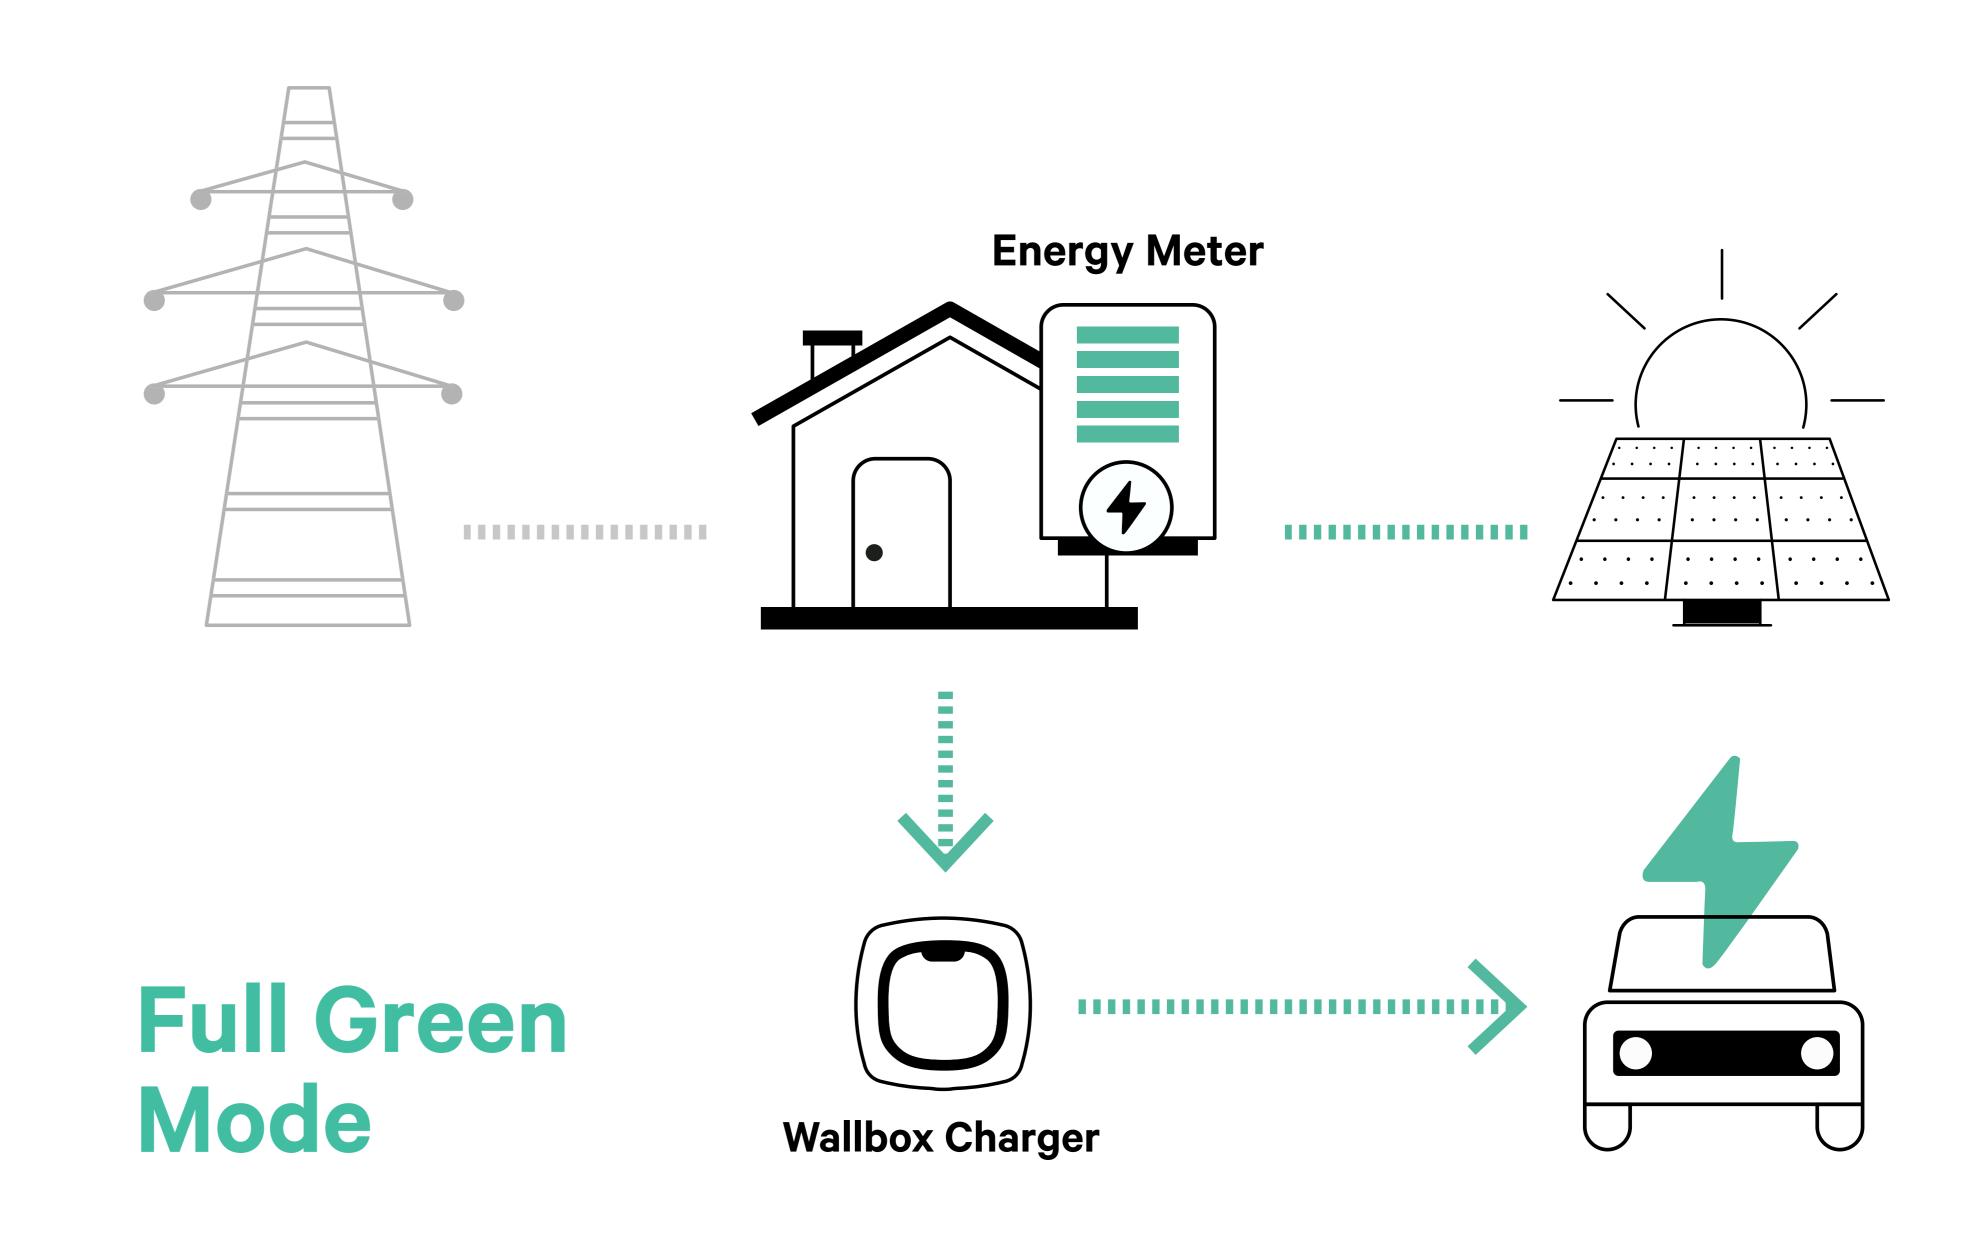

Delivers more savings

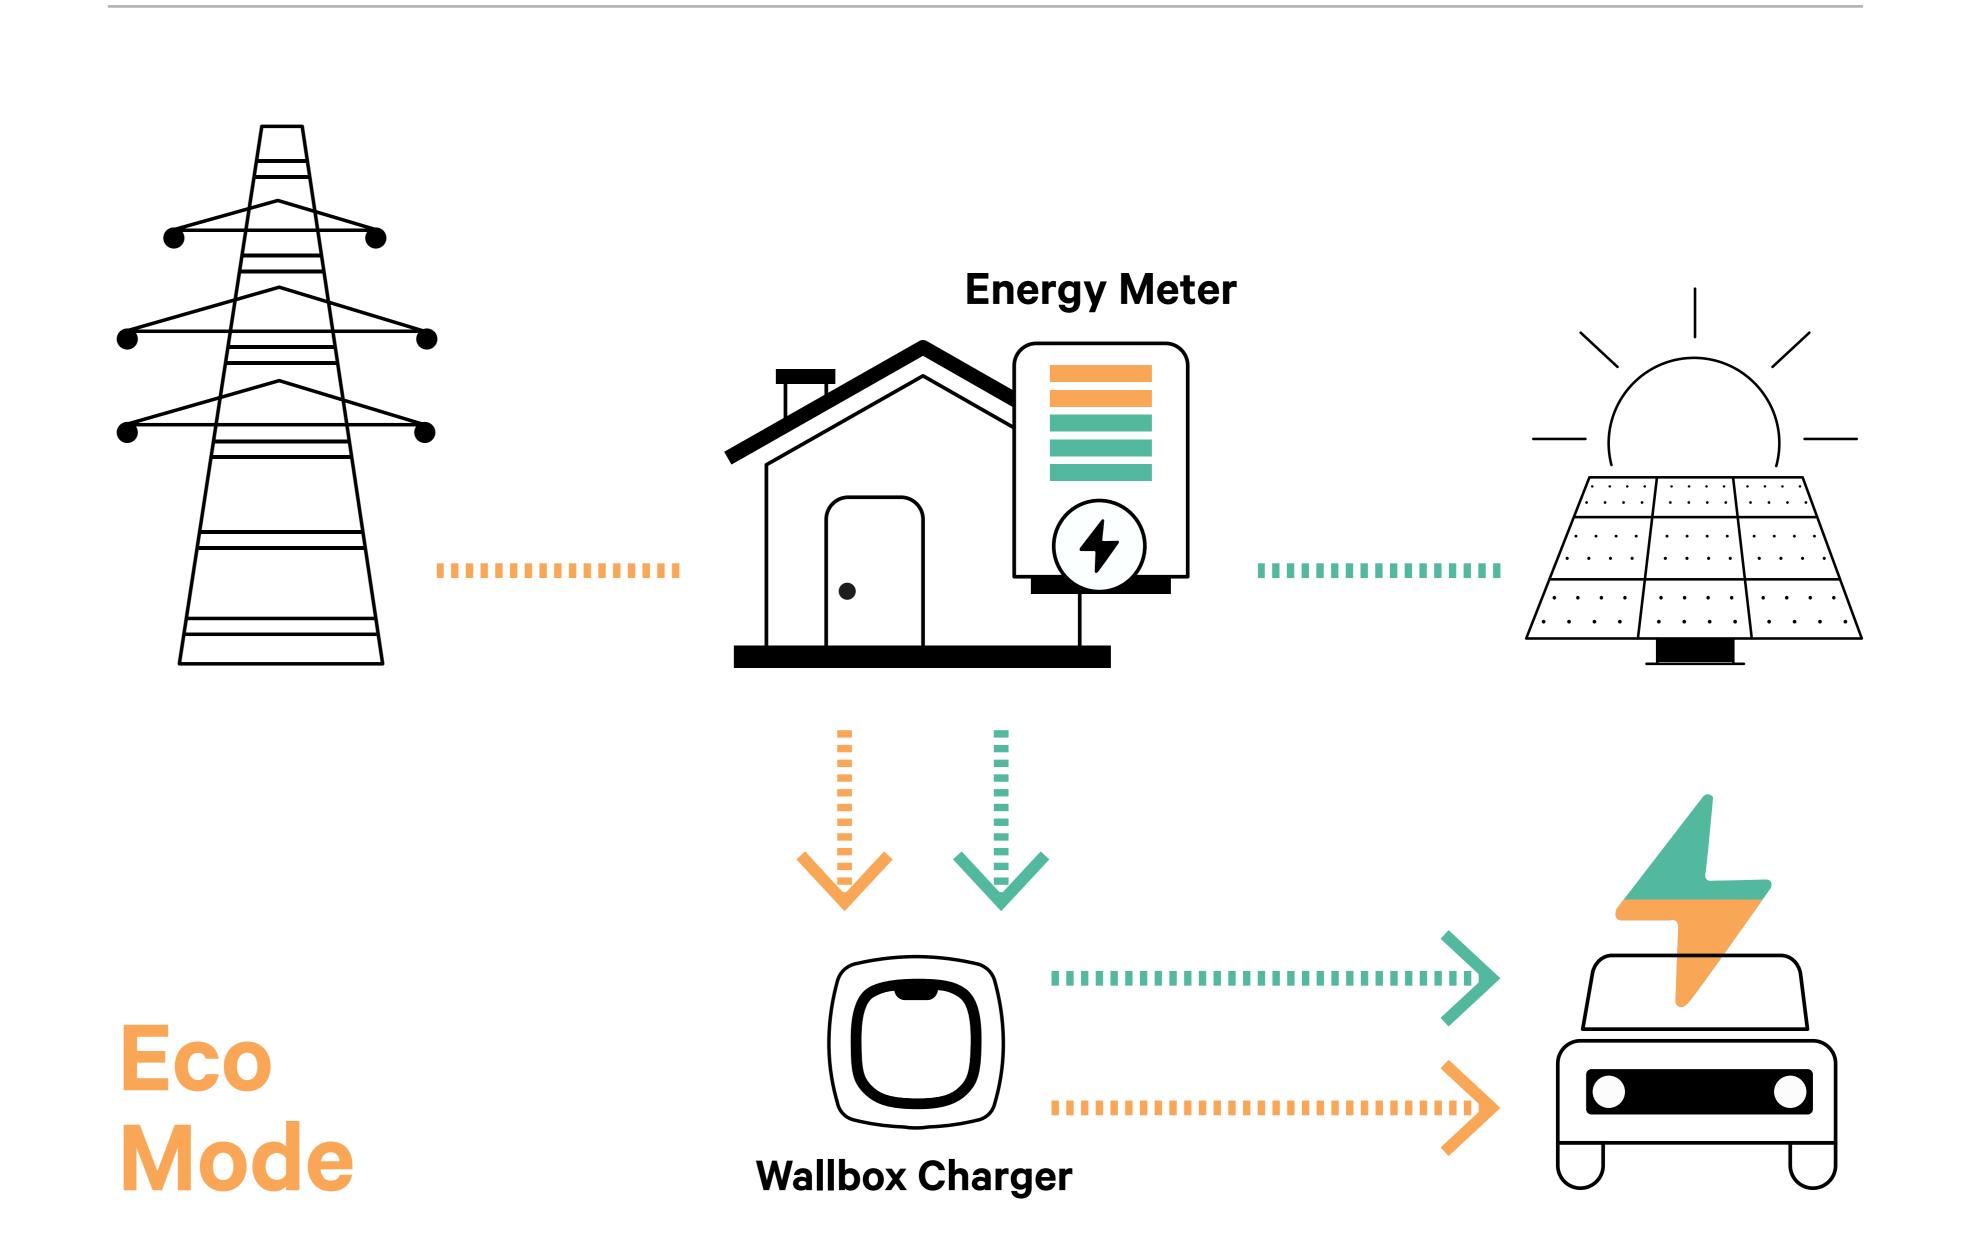

Users save on their electricity bill by using the free, clean energy that's already theirs.
