## Inverter Grid Code Settings

The new inverter standard AS/NZS 4777.2:2020 has specified that inverters power quality settings are defined by region of installation: Australia A, Australia B, Australia C and New Zealand. The table below provides a list of the regions and the corresponding Distribution Network Service Provider (DNSP):

DNSP	Region
Ausgrid Ausnet Citipower Endeavour Energy Energex Ergon Essential Energy Evoenergy Jemena SA Power Networks PowerCor United Energy	AU AS/NZS 4777.2:2020 A
Western Power	AU AS/NZS 4777.2:2020 B
Horizon Power TasNetworks	AU AS/NZS 4777.2:2020 C
New Zealand DNSPs	NZ AS/NZS 4777.2:2020

To simplify the commissioning procedure, Solplanet inverters provide four grid code settings for any installation in Australia or New Zealand. Installers only need to select correct grid code according to region of installation. Solplanet APP will be used for commissioning Solplanet inverters.

Installers need login their business user account, then they can select grid code either locally or remotely

Registration / login business user account
