- No changes

New Optional Features:

- Premium Packages in Black or Sepia colors changed to NuLuxe® interior trim
- Blind Spot Monitor with Rear Cross-Traffic Alert available as no charge option

PLANO, TX – Versatility best describes the Lexus 2019 GX 460. This luxury SUV is engineered for all kinds of terrain including extreme off-road conditions. Along with the capability of handling rocky trails and city streets, the GX also displays exceptional craftsmanship.

The three-row GX 460 seats up to seven passengers. Heated and ventilated front seats are available as a standalone option for the base model and standard on the Premium and Luxury models. In the Sport Design Package, the GX offers captain's chairs for the second-row seating.

Like every Lexus model, the GX flashes a signature spindle grille which gives the SUV a distinctive, standout style. The Sport Design Package puts an extra touch on the luxury SUV with special details such as an exclusive front fascia, rear valence, chrome exhaust tip, scarlet taillamps and 18-inch split-six alloy wheels with Gunmetal Metallic finish.

Ideal for all families

A dual-purpose SUV, the GX 460 can go from a short work commute to a long family vacation deep in the Rocky Mountains. The standard and sole engine is a 301-horsepower 4.6-liter V8 that produces up to 329 lb.-ft. of peak torque. Combine that with 6,500-lb. towing capacity, and you've got an ideal boat hauler. Towing is aided with Trailer Sway Control, a function of the Vehicle Stability Control that enhances straight-line tracking.

Handcrafted details and hand-selected materials

Elegance is standard on the GX 460. Available features include a wood and leather-trimmed heated steering wheel and wood and leather-trimmed shift knob — both crafted exclusively with hand-selected materials.

The GX comes in seven vibrant exterior colors — Starfire Pearl, Silver Lining Metallic, Nebula Gray Pearl, Nightfall Mica, Fire Agate Pearl, Black Onyx and Claret Mica. The GX interior is available in the following three colors: Black, Sepia or Ecu.

Control of the road

Utilizing the technology of the Kinetic Dynamic Suspension System (KDSS), the GX 460 can improve on-road handling and ride comfort by assuring that the vehicle remains level. When the GX encounters an uneven surface, one compressed cylinder causes fluid to flow to the other cylinder, helping the vehicle to keep all four wheels on the ground. The system works without any action needed by the driver.

Another asset of the GX for on-road smoothness is the available Adaptive Variable Suspension (AVS). The AVS uses electronically controlled dampers that adjust to road surface conditions. The driver can tailor the ride by selecting from Normal, Sport or Comfort modes.

Four-Wheel Active Traction

With a full-time automatic four-wheel drive system, the Lexus GX 460 is ready for handling the trails as well as on the pavement.

A Torsen® torque-sensing limited slip center differential distributes power 40:60 under most driving conditions and changes the ratio as needed based on wheel slip. The system offers a low range for slow speed off-road driving, and the center differential can be electronically locked.

A two-speed transfer case with low range is supported by a wide array of chassis control technology. With Downhill Assist Control (DAC), Hill-start Assist Control (HAC), Active Traction Control (A-TRAC), Vehicle Stability Control (VSC) and available Crawl Control, the GX can roam unpaved, uneven trails and steep inclines.

Crawl Control – Advanced Technology

Activated with the press of a button, the available Crawl Control system is designed to automatically maintain an optimal slow and steady pace over demanding landscapes.

Engaged when the vehicle is in low range, Crawl Control allows the vehicle to move forward or in reverse at one of five driver-selectable low-speed settings. Crawl Control also engages the front and rear “virtual” locking differentials to help reduce tire slippage and optimize chassis behavior. Crawl Control can also help the driver navigate the GX 460 through sand, mud or snow.

Multimedia and Connect Services

A multimedia system on the GX offers a customizable home screen that can display three sections simultaneously. The available Navigation System’s three-dimensional map view makes it an even more effective driving partner.

Drivers can navigate the roads with confidence with the Lexus Enform Safety Connect complimentary for the first 10 years of ownership with access to Lexus Enform response centers 24/7/365. With Lexus Enform Service Connect, the vehicle can also send alerts for specific factory recommended maintenance, simultaneously alerting a preferred Lexus retailer. The Lexus Drivers mobile app or LexusDrivers.com website can be used to set push-reminders and alerts for maintenance and service issues.

With Lexus Enform Remote, the customer can remotely start the engine and climate controls, lock and unlock doors, check the fuel level and more through a smartphone, smartwatch or Amazon Alexa-enabled devices at home.

Panoramic view

A Blind Spot Monitor (BSM) with Rear Cross-Traffic Alert is now offered at no charge. And to help keep the driver’s focused on the road, the GX 460 is available with a Driver Support Package which includes Pre-Collision with Dynamic Radar Cruise Control, Driver Attention Monitor, Lane Departure Alert, Intelligent high-beam headlamps as well as a wide-view front and side monitor system.

The Lexus GX 460 is equipped to handle today’s modern family and is designed to help them arrive in style, comfort and safety wherever their adventures lead.
