

**Let Uniloy’s “Maestro Lube” Put Lubrication Where it’s Needed!**

Uniloy’s “Maestro Lube” Central Manual Lube System is the subject of this month’s web posting. This system is available for all Uniloy clamp sizes. It incorporates all of the advantages that other commonly used lubrication systems possess.

**Lube System Comparison Table**

<b>Advantages</b>	<b>Manual Lube</b>	<b>Auto Lube</b>	<b>Maestro Lube</b>
No Machine Interruption		X	X
Easy To Use		X	X
The Right Amount of Grease	X		X
Grease at the Right Time		X	X

“Maestro Lube” combines the efficiency and production friendly nature of an auto lube system with the benefits of direct human interaction to provide the right amount of grease at exactly the right time.

**How Does “Maestro Lube” Get The Job Done?**

This central manual lube system uses a collection of grease zerks, junction blocks, flexible hose and tubing to direct grease to the clamps lube points. The system brings all of the zerks outside of the guarding so the clamp can be lubricated while the machine is running. The grease zerks are labeled and positioned in rows on a plate which is mounted to the side of the A-frame.

Proper lubrication of the clamp components can ensure smooth clamp operation and extended part life due to reduced friction and wear.

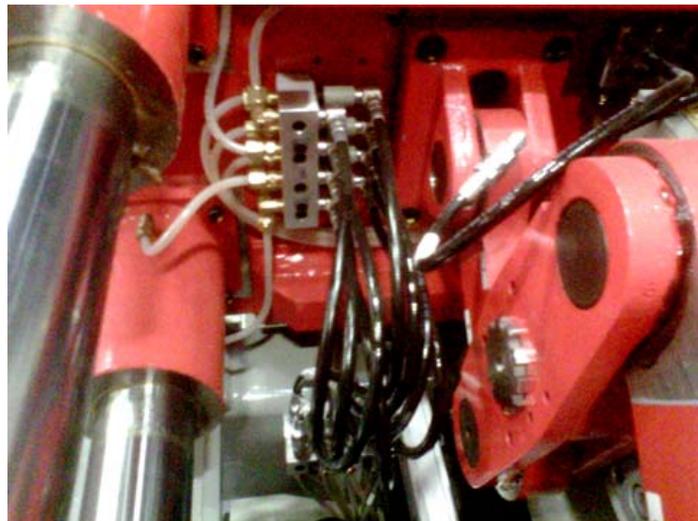

The following link will provide lubrication and maintenance instructions for a Uniloy Recip machine. This instruction includes the type and amount of grease and the frequency each lube point requires.

[General Lubrication Maintenance Instructions](#)

**The Retrofit Includes:**

- Grease Zerk Mounting Plate
- Grease Zerks and Labels
- Junction Blocks
- Flexible Hose Assemblies
- Plastic Tubing
- Fittings and Tube Clips

**Sales and Service**

For more information on this product offering or any other machine upgrade, please contact your local Uniloy Parts Sales Representative. Trained Uniloy Service Representatives are available to assist in the installation of these packages at your facility.
