

Plastic Trimmer Buckets For Reciprocating Screw Machines In Dairy Applications

Increase the productivity and repeatability of your trimmer. Lighten it's load! Replace heavy stainless steel buckets with lighter, tougher urethane plastic buckets.

Plastic Bucket Benefits

They are significantly lighter

The Plastic Gallon Bucket (Uniloy # 80122-835 / CM # 5475836) weighs .60 lb which is 1 lb / bucket less than a stainless steel heavy duty gallon bucket.

The Plastic Half Gallon Bucket (Uniloy # 70219-335 / CM # 5475794) weighs .85 lb which is .5 lb / bucket less than a stainless steel heavy duty half gallon bucket.

This weight reduction translates to:

- Less trimmer wear, which increases components life.
- Less chain stretching, which promotes more accurate indexing and less maintenance.
- Approximately 40% less torque and horsepower is required to index the trimmer.
- Modest energy savings (depending on your application, you can expect savings of up to \$200 per year).

They are built to last

Each plastic bucket:

- is a single piece Urethane casting formulated for high abrasion and impact resistance. has a shape memory, so the angles on the bucket do not change when stressed.
- is modeled after our heavy duty bucket which has support ribs and is stronger than our standard bucket.

They are interchangeable

You can add plastic buckets in any quantity desired because they are interchangeable with our other buckets for these dairy applications.

For gallon buckets please order Uniloy # 80122-835 / CM # 5475836.

For half gallon buckets please order Uniloy # 70219-335 / CM # 5475794.

Take advantage of Uniloy Milacron's quantity discount program to upgrade your trimming operation:

Installation

Both plastic bucket models mount to their carriers with 2 bolts. If you have a 10026 trimmer with double bucket chains, your bucket carriers have 4 mounting holes, and new bucket carriers will be required.

For gallon bucket carriers (8" centers) please order Uniloy # 846144 / CM # 5476050.

For half gallon bucket carriers (6" centers) please order Uniloy # 846142 / CM # 5476048.

The following chart shows the number of buckets which our more popular trimmers have:

Trimmer	Dairy Gallon Application (8" Centers) # of Buckets	Dairy Half Gallon Application (6" Centers) # of Buckets
10026	27	36
10040, 10041, 10042	36	48
10039 and 10026 DL	30	40
10041 Direct Load	42	56
