

WTC Profile According to Machine Side

Product Description: WTC profile for different articles being produced one the same machine.

Features:

- For a dual station machine this upgrade allows **different** products to be produced on side one and side two – simultaneously.
- The WTC profile from side 2 can be seen here as a slave, overlaid on side 1. Side 1 is displayed as master
- (NOTE: this is only possible if the product centres are exactly the same)

Hardware structure:

- Program upgrade required.

Main functions:

- Increased product flexibility and diversity possible : one machine manufacturing 2 completely different products at the same time.
