

Automated Basic Gap regulation

Product Description: Automatically regulated head die gap adjustment

Advantages:

- Automated die gap adjustment
- Faster, automatic product weight correction time
- Reduces waste

Features:

- Connected to downstream weight checking device, it provides automated adjustment of die gap (using WTC profile) to correct product weight within specified and adjustable tolerance.

Hardware structure:

- PLC programme and wiring upgrade required.
- Installation of compatible weighing device required.

Main functions:

- Automatic regulation of product weight
