

ARTICLE JAM CONTROL

Product Description: Article jam control

Advantages:

- Alert/alarm function allows monitoring of downstream product jam
- Simple and cost effective to fit.
- Break-beam detection used to monitor and detect bottle jams downstream, generating an alert which stops take out operation until the obstruction is removed and acknowledged.

Hardware structure:

- PE sensor fitted to take-out conveyor, with reflector.
- Signal cable Connected to Bus extension panel +S1, or +S2 depending on belt direction.
- Wiring and programme upgrade required

Main functions:

- Detects downstream product jam on take out Conveyor. And sends alert/alarm to visualisation screen.
