

## ADDITIONAL HEATING ZONES

### Product Description:

Individually controlled additional heating zone

### Advantages:

- Increased process control/product range flexibility

### Features:

- Required when modifying to the extrusion process, for instance: adding extruders for multi layers; changing head type, adding view stripe; adding screen changer, static mixer and melt temperature monitoring
- Includes all hard and software (not the heater band itself)

### Hardware structure:

- Additional wiring, relays and control program changes required
- Additional Heater band/s required per extra zone.
- 230- 400 V heating zones available

**Main functions:** Additional heating zones.
