

SUPPORT AIR DECOMPRESSION

Product Description: Support air decompression facility

Advantages:

- Greater control over the parison at the end of the blowing
- Cycle than just with support air alone (product dependant)

Features:

- Manually adjustable support air function

Hardware Requirements :

- Requires the installation of an air valve, manometer with pressure regulator, air hoses and associated fittings.
- Replacement window section required.
- Please quote machine serial number for suitability.

Main functions:

- Provides a decompression function via vacuum which negatively steers the support air,
