Occupational exposure limits, if available, are listed in Section 8.

Section 4. First-Aid Measures

- **Eye Contact**: Immediately flush with water for 15 minutes. Seek medical attention.
- **Skin Contact**: Remove from skin and wash thoroughly with soap and water or waterless cleanser. Get medical attention if irritation or other ill effects develop or persist.
- **Inhalation**: Material is not likely to present an inhalation hazard at ambient conditions. If material is heated or vapor are generated, care should be taken to prevent inhalation. In case of exposure to vapor, move to fresh air.
- **Ingestion**: DO NOT INDUCE VOMITING. Seek immediate medical attention.
- **Comments**: Treat according to person's condition and specifics of exposure.

Section 5. Fire Fighting Measures

- **Suitable Extinguishing Media**: On large fires use dry chemical, foam, or water spray. On small fires use carbon dioxide, dry chemical or water spray. Water can be used to cool fire exposed containers.
- **Unsuitable Extinguishing Media**: None known
- **Special Fire Fighting Procedures**: Self-contained breathing apparatus and protective clothing should be worn when fighting large fires involving chemicals. Determine the need to evacuate or isolate the area according to your local emergency plan. Use water spray to keep fire exposed containers cool.
- **Unusual Fire or Explosion Hazards**: None known
- **Hazardous Decomposition Products**: Thermal breakdown of this product during fire or very high heat conditions may evolve the following hazardous decomposition products:
  - Carbon oxides and traces of incompletely burned carbon compounds
  - Formaldehyde
  - Silicon dioxide
  - Nitrogen oxides
  - Metal oxides
  - Sulfur oxides
  - Chlorine compounds
When temperatures above 150°C in the presence of air, product can form formaldehyde vapors. Formaldehyde is a potential cancer hazard, a known skin and respiratory sensitizer, and an irritant to the eyes, nose, throat, skin and digestive system. Safe handling conditions may be maintained by keeping vapor concentrations within the OSHA Permissible Exposure Limits for formaldehyde.

**Section 6. Accidental Release Measures**

**Steps to be taken in case of spill or release**

Observe all personal protection equipment recommendations. Wipe up or scrape up and contain for salvage or disposal. Clean area as appropriate since spilled materials, even in small quantities, may present a slip hazard. Final cleaning may require steam, solvents or detergents. Dispose of saturated absorbant or cleaning materials appropriately, since spontaneous heating may occur.

Local, state and federal laws and regulations may apply to releases and disposal of this material, as well as those materials and items employed in the cleanup of releases. You will need to determine which federal, state and local laws and regulations are applicable. Sections 13 and 15 of this MSDS provide information regarding certain federal and state requirements.

**Section 7. Handling and Storage**

**Storage**

Use reasonable care and store away from oxidizing materials. Keep container closed and store away from water or moisture. This material in its finely divided form presents an explosion hazard. Follow NFPA 654 (for chemical dusts) or 484 (for metal dusts) as appropriate for managing dust hazards to minimize secondary explosion potential.

**Handling**

Use with adequate ventilation. Product evolves acetic acid with exposed to water or humid air. Provide ventilation during use to control acetic acid with exposure guidelines or use respiratory protection. Avoid eye contact. Avoid skin contact. Do not take internally. Avoid breathing vapor. Keep container closed.

**Section 8. Exposure Controls/Personal Protection**

**Personal Protective Equipment**

- Goggles, Gloves

**Engineering Controls**

- Local Ventilation: Recommended
- General Ventilation: Recommended

**Eye Protection**

- Use proper protection - safety glasses as a minimum.

**Skin Protection**

- Wash at mealtimes and end of shift. Contaminated clothing and shoes should be removed as soon as practical and thoroughly cleaned before reuse.
Chemical protective gloves are recommended.

Suitable Gloves:
Handle in accordance with good industrial hygiene and safety practices.

Respiratory Protection
Use respiratory protection unless adequate exhaust ventilation is provided or exposure assessment demonstrates that exposures are within exposure guidelines. Industrial Hygiene Personnel can assist in judging the adequacy of existing engineering controls.

Suitable Respirator
Respiratory protection is not needed under ambient conditions. If vapor is generated when material is heated or handled, the following is advised. General and local exhaust ventilation is recommended to maintain vapor exposures below recommended limits. Where concentrations are above recommended limits or are unknown, appropriate respiratory protection should be worn. Follow OSHA respirator regulations (29 CFR 1910.134) and use NIOSH/MSHA approved respirators.

Precautionary Measures
Avoid eye contact. Avoid skin contact. Avoid breathing vapor. Keep container closed. Do not take internally. Use reasonable care.

Comment
Product evolves acetic acid when exposed to water or humid air. Provide ventilation during use to control acetic acid within exposure guidelines or use respiratory protection.

When heated to temperatures above 150C (300F) in the presence of air, product can form formaldehyde vapors. Physical and health hazard information is readily available on the Material Safety Data Sheet.

Note
These precautions are for room temperature handling. Use at elevated temperatures or aerosol/spray applications may require added precautions.

Section 10. Stability and Reactivity

Materials to Avoid / Incompatibility
Oxidizing material can cause a reaction. Water, moisture or humid air can cause hazardous vapors to form as described in Section 8.

Conditions to Avoid
None known

Hazardous polymerization
Will not occur

Chemical Stability
Stable

Section 11. Toxicological Information

Special Hazard Information on Components
No known applicable information.

Component Toxicology Information
Inhalation of fumes may result in metal fume fever, a flu-like illness with symptoms of metallic taste, fever and chills, aches, chest tightness and cough.

Section 12. Ecological Information

Fate and Effects in Waste Water Treatment Plants
Complete information is not yet available.

Environmental Effects
Complete information is not yet available.

Environmental Fate and Distribution
Complete information is not yet available.

Section 13. Disposal

Waste Disposal Method
We make no guarantee or warranty of any kind that the use or disposal of this product complies with all local, state, or federal laws. It is also the obligation of
each user of the product mentioned herein to determine and comply with the requirements of all applicable statutes.

This product is not known to be regulated under RCRA regulations, but contains SARA regulated substances. Disposal of unused portions of this product and process waste containing this product should be done only after a careful evaluation and in compliance with all federal, local and state laws.

### Section 15. Regulatory Information

| TSCA Status                     | All chemical substances found in this product comply with the Toxic Substances Control Act inventory reporting requirements. |
| SARA Title III Section 302 Extremely Hazardous Substances | None |
| SARA Title III Section 304 CERCLA Substances dangereuses | None |
| SARA Title III Section 312 Hazard Class | Acute: Yes  
Chronic: No  
Fire: No  
Pressure: No  
Reactive: No |
| SARA Title III Section 313 Toxic Chemicals | Copper chlorophthalocyanine (12239-87-1) |
| Note | Chemicals are listed under the 313 Toxic Chemicals section only if they meet or exceed a reporting threshold. |
| California Proposition 65 | This product contains the following chemical(s) listed by the State of California under the Safe Drinking Water and Toxic Enforcement Act of 1986 (Proposition 65) as being known to cause cancer, birth defects or other reproductive harm:  
None known |
| Massachusetts | Copper chlorophthalocyanine (12239-87-1)  
Silica, amorphous (7631-86-9)  
Titanium dioxide (13463-67-7) |
| New Jersey | Copper chlorophthalocyanine (12239-87-1)
