

JUNIPER®

THIN Multiples Vertical Suspension Local Installation Guide

Vertical TRIAD

Vertical TETRAD

WARNING

A LICENSED ELECTRICIAN SHOULD PERFORM INSTALLATION.
DISCONNECT MAIN POWER AT THE SOURCE PRIOR TO INSTALLATION.

INSTRUCTIONS MEANT FOR A LOCAL CLASS 2 DRIVER.

STEP 1: JUNCTION BOX COVER PLATE INSTALLATION INSTRUCTIONS

FIGURE 1

Remove screws from the canopy assembly to release the mounting plate.

FIGURE 2

Attach the mounting plate to the junction box using provided screws.

FIGURE 3

Partly loosen safety nut on cable gripper. Feed aircraft cable through the gripper. Do this for all aircraft cable ends.

FIGURE 4

Pass power cable through bushing and strain relief as shown. Connect wires according to diagram (wire nuts provided). **Length of power cord should be adjusted for desired suspension height. AC wires to the driver are not provided.**

FIGURE 5

- Attach LED Driver to mounting plate using provided double-sided tape strips.
- Attach gripper to canopy using provided nut, as shown above.
- Place wires inside canopy and attach the canopy to the mounting plate using screws removed during first instruction.

STEP 2: LIGHT TUBE INSTALLATIONS

The THIN Multiples fixture is designed with an innovative magnetic connection. Simply insert the light tubes into their sleeves for electrical contact to be made.

FIGURE 6

1. Reconnect main power and insert light tubes into the power sleeve. Push light tubes in carefully until they illuminate.
2. Secure each light tube in its position by tightening the provided #8-32 set screws.
3. Slide the end sleeve onto the light tubes.
4. Space the O-rings apart on the power sleeve along the length of the cable to constrain the power cord to aircraft cable.

CARE INSTRUCTIONS

Brass will patina over time like other natural metals and regular care is required in order to retain the quality finish of your THIN fixture for years to come.

Gently wipe with a damp cloth to remove dirt, dust, and fingerprints.

Do not use any chemical cleaning solution.

Use indoors only.
