Eco-Roma

Visualize | Realize | The leather you imagine, and more.

Eco-Roma Finished Beginning with a heavy weight, thicker European bull hide which is re-tanned with an all-vegetable formula that leaves the hides firm yet yielding, with a tight, graceful grain break. A light, sophisticated semi-aniline finishing treatment is added to even the color and for protection.

Eco-Roma Natural A pure aniline of the highest quality, Eco-Roma Natural begins with a heavyweight, thicker European bull hide which is re-tanned with an all-vegetable formula that leaves the hides firm yet yielding, with a tight, graceful grain break. Cold-rolled for a smooth finish and slight sheen, each hide of Eco-Roma Natural is unique and celebrates the natural authenticity of leather.

Note: Environmentally friendly Eco-Roma is lead free, emits low VOCs and has achieved an Indoor Gold Advantage certificate from SCS.

Technical Specifications

	Eco-Roma Finished	Eco-Roma Natural
Origin	Italy	Italy
Raw Material	Full grain European bulls	Full grain European bulls
Leather Type	Semi-aniline	Pure aniline
Hide Size	50 – 55 sq.ft.	50 – 55 sq.ft.
Thickness	1.0 – 1.2 mm	1.0 – 1.2 mm
Abrasion Resistance	ASTM D7255: CS10 Taber Wheel 250 Cycles/250 gram weight	ASTM D7255: CS10 Taber Wheel 500 Cycles/500 gram weight
Light Fastness	ISO 102-B05: Blue Wool Scale ≥ 4	ISO 102-B05: Blue Wool Scale ≥ 2
Wet Crocking	ASTM D5053: Class 4	ASTM D5053: Class 1
Flame Resistance	NFPA 260: Class 1; CAL TB117-2013	NFPA 260: Class 1; CAL TB117-2013
Performance Category	2	1
Cleaning Code	3	1

Eco-Roma

Performance Category

Eco-Roma Finished Leathers with Performance Category 2 retain their natural appearance while carrying additional protections against abrasion, staining and color fading. Aniline leathers with some protection and semi-anilines are found here. These leathers are suitable for a wide range of applications across a wide range of wear and stain risk, such as those found in commercial settings and dining areas. More information is available on our website at cortinaleathers.com/resources/performance/.

Eco-Roma Natural Leathers with Performance Category 1 are considered by many to be the most beautiful and authentic leathers, most likely because they are least protected. These leathers include pure anilines, aniline leathers with less protection, nubuck leathers, suedes, etc. All Category 1 leathers are protected with water repellency to resist water spotting and are expected to patina, wear and age gracefully over time, making them perfect for many applications. However, these leathers are not recommended for uses where they will be subjected to heavy staining, abrasive wear or direct sunlight. More information is available on our website at cortinaleathers.com/resources/performance/.

Care & Cleaning

Eco-Roma Finished Semi-aniline leathers are protected against scratching and scuffing and designed to maintain their beauty over time. Very little care is required—general upkeep requires only an occasional dusting with a clean cloth. Never use oils, saddle soaps, harsh cleaners or cleaners containing abrasives on semi-aniline leather. Periodically, you may wish to gently wipe the leather with a clean, damp cloth to remove accumulated soil, then allow it to air dry. Should a spill occur, blot (pressing gently without rubbing) immediately to avoid permanent discoloration with clean, dry sections of an absorbent cloth. Should soiling remain, a solution of lukewarm water and a mild soap such as Ivory® or a mild cleanser such as Woolite® may be used. Dampen a clean white cloth in the solution and gently wipe the affected area using a circular motion. Never apply the solution directly to the leather. Rinse completely with clean cloth which is damp with plain water until all cleaner is removed. Blot dry with a paper towels or dry cloth and allow to completely air dry. It may be necessary to repeat this procedure, allowing the leather to completely dry between applications. To avoid harming the leather, do not rub vigorously or for an extended period. It may not be possible to remove all stains from this natural product. More information is available on our website at cortinaleathers.com/resources/care-cleaning/.

Eco-Roma Natural Pure aniline and aniline leathers are designed to age and patina gracefully, increasing in beauty over time. Cortina Leathers' pure aniline/aniline leathers are treated in the drum for water and soil repellency and so can be maintained with very little care. General upkeep requires only an occasional dusting with a clean cloth. Never use oils, saddle soaps, conditioners or cleaners on pure aniline or aniline leather. Pure aniline/aniline leathers have the least amount of protective finish, so spills and soiling should be removed immediately to avoid permanent discoloration. Should a spill occur, blot (pressing gently without rubbing) the spill with clean, dry sections of an absorbent cloth to soak up any remaining liquid. Do not rub. Should soiling remain, use lukewarm water to minimally dampen a clean white cloth with plain water and gently blot the affected area. Blot dry with paper towels or dry cloth, and allow to air dry. Caution must be used. It may be necessary to cease efforts prior to total stain removal because over-rubbing and over-wetting can do additional harm to the leather's appearance. It may not be possible to remove all stains from this natural product. More information is available on our website at cortinaleathers.com/resources/care-cleaning/.

Warranty

Leathers with Performance Categories 1 and 2 have a 1 year limited warranty against manufacturing defects. See complete details at cortinaleathers.com/resources/warranty/.
