COMPATIBILITY & RESTRICTIONS

Zerust vapor capsules and storage bags can be used in any environment with no measurable chemical interaction with other elements. There is no likelihood that the vapors will enhance flammability or react with industrial or marine atmospheres to create any by-products. Surfaces exposed to Zerust vapors do not exhibit any measurable changes in their electrical, mechanical or chemical properties.

Do not install capsules where they may be submerged or come in contact with bulk water.

Zerust vapor capsules will not provide protection from corrosion caused by direct contact of the metal with acids, water, etc.

Over an extended period of time, Zerust products will "yellow" paper. Do not use in proximity to antique books, photographs or valuable documents, etc.

Because Zerust cannot anticipate or control the many different conditions under which this information or these products may be used, no warranty, express or implied, is made except that the product conforms to the manufacturer's specifications. The buyer/user assumes all risk of use, storage, and handling of these products. Zerust will not be responsible for special or consequential damages.

Zerust Vapor Capsules must not be disassembled to expose the contents. In case of accidental ingestion give water and induce vomiting.

Zerust are cleared by the U.S. Food and Drug Administration. No special handling or disposing is required. No unpleasant aromas are emitted. Electrical or mechanical properties of the packaged item are not affected.

Northern Technologies International Corporation (NTI) is the manufacturer of a broad range of Zerust corrosion inhibiting products to meet industrial and consumer needs.

The company maintains extensive laboratories in the U.S., Germany, Russia, and Japan, under the direction of several of the world's recognized corrosion experts. It is our mission to make our formulations ever stronger while insisting on product safety and environmental responsibility.

Zerust®

**EASY RUST PROTECTION
WITHOUT MESSY OILS**

**PROTECT YOUR
FIREARMS WITH
INVISIBLE, ODORLESS,
NON-TOXIC VAPORS**

Zerust® Firearm Bags and Capsules

The Easy and Carefree Way to Protect Against Rust and Corrosion

Zerust® ADVANCED PROTECTION

Now there is a better way to protect your firearms against the hazards of rust and corrosion. It's easy and effortless. If you have a gun safe or case, just place one of our vapor capsules inside with your guns and close the door or lid. Or, simply place your firearm into a vapor bag, insert the barrell strip, seal the bag and place in your safe, case, rifle bag or any air restricted container. Every metal surface inside and outside you firearm will be protected against rust and corrosion.

Just think, no more oiling, no more mess in your gun case or safe.

Simply pack it, seal it, put it away in an enclosure and forget it. Zerust® is invisible,

safe, odorless, non-toxic and approved by the U.S. Food and Drug Administration. Highly effective, very simple and Zerust® capsules and bags provide years of protection without harming wood or wood finishes. And best of all, Zerust® has absolutely no effect on the environment.

How Zerust® WORKS

Our patented vapor capsules and bags contain proprietary Zerust® VCI (Vapor Corrosion Inhibitor) formulations that are designed to protect metal surfaces from rust and corrosion while within an enclosure. Whether using capsules in a safe, or gun bags impregnated with Zerust® VCIs, the air inside the enclosure quickly becomes saturated with VCI vapor molecules that automatically release into the confined air space and attach themselves to all exposed metal surfaces. The VCIs cling to the metal until the enclosure is opened and the firearm removed. Within minutes of being exposed to open air, the harmless VCI molecules vaporize from the metal leaving all surfaces clean, dry and corrosion free.

RIFLE BAG

BARREL STRIP

THINK ENCLOSURE

Zerust® capsules and bags maintain their potency best within enclosures that limit air exchange with the outside atmosphere, but the containers you use do not need to be 100 percent air tight like a gun safe. Rifle bags, cabinets, display cases, toolboxes and other containers all serve to minimize air exchange and thereby help maintain a high concentration of VCIs. Higher concentrations mean increased effectiveness, so it is important to limit air exchange in order for the enclosed atmosphere to reach saturation levels of VCIs.

POSITIONING OF CAPSULES IN A GUN SAFE OR ENCLOSURE

When at all possible, capsules should be located in the center of an enclosure. The VC2-2 capsule is most effective within a 2 ft. radius from its location and in a volume of 33.5 cubic feet. If your enclosed area is larger than this, we recommend you use two or three capsules. The approximate life span of one capsule serving 33.5 cubic feet of volume will be 2 years. That is what makes Zerust® such a convenient, economical, corrosion protection alternative. Just place it and forget it. Each capsule has a convenience label to write the date when you first open and place it in your storage enclosure.

WHAT ELSE WILL ZERUST® PROTECT?

Zerust® will protect Aluminum, Brass, Copper, Iron, Nickel, Steel and Silver. Zerust VCI's have proven themselves in industrial applications in over 40 countries worldwide.

Now available for consumer use, our capsules and bags protect all sorts of household items in storage enclosures. Fishing tackle, outboard motors, tools, coin collections, motorcycles, snow throwers, motorcycles, Zerust® protects almost all of your metal valuables from rust and corrosion.
