About U.T. HEALTH

UT Health is a health supplement for dogs and cats designed as a crisis intervention solution for urinary tract issues. Cats and smaller dogs are particularly prone to infections. In fact, urinary tract health issues are the #1 reason cats go to the veterinarian. Accidents, pain, and difficulty urinating are just a few symptoms your pet may experience if they have a buildup of bacteria, particularly E.coli, in their urinary tract. Commonly, antibiotics are prescribed for these symptoms. While there is nothing inherently wrong with antibiotics, they can't distinguish between good or bad bacteria, leaving your pet's immune system weakened and increasing the chances of recurring infections. Particularly in cats, recurring infections can lead to blockages which may ultimately require surgery. UT Health is a natural healing alternative featuring D-mannose, which helps to eradicate E. coli, and antioxidant-rich botanicals to support and restore urinary tract health.

- **Grain-free**
- **Antioxidants**
- **Beef liver powder for palatability**
- **Healing**
- **Eases Discomfort**
- **Support and restore urinary tract health**
- **Doesn't negatively affect good/bad bacteria balance**
- **Natural, plant-based ingredients**
- **Immune Boosting**

D-Mannose

D-Mannose is an anti-microbial sugar that occurs naturally in cranberries. It's not metabolized like most sugars, which means it doesn't disrupt pH or blood sugar balance, it doesn't cause additional pancreatic stress (insulin release), and it doesn't change the level of good to bad bacteria in your pet's digestive tract. While getting eliminated from the body through the urinary tract, D-Mannose binds to sites where bacteria are attached. The bacteria,

particularly E. Coli, are attracted to D-Mannose and get dislodged, then eliminated from the body along with the D-Mannose.

Botanicals

High antioxidant ingredients that benefit the urinary tract

- **Parsley** Antiseptic properties & a diuretic
- **Uva-Ursi** Antiseptic qualities to help cleanse urinary tract
- **Cranberries & Blueberries** Prevent bacteria from adhering to the bladder wall and tissues of the urinary tract
- **Goldenseal** Anti-inflammatory, healing for mucous membranes, immune boosting
- **Goldenrod** Anti-inflammatory, antibacterial, analgesic, and diuretic
- **Dandelion** Natural diuretic, detoxifying

What's That?

Diuretic Promotes Urination

Analgesic Pain Management

Antiseptic Helps cleanse urinary tract

Who Could Benefit?

CATS & DOGS ANY AGE
