CURCUMINOIDS

Curcuminoids are the brilliant orange pigments of Turmeric (*Curcuma longa*). They belong to the family of polyphenols that includes all bioflavonoids, flavans and flavanols. All polyphenols are antioxidants, with certain groups stronger than others. Among the most powerful are curcuminoids.

Anti-inflammatory curcuminoids from turmeric are notoriously poorly absorbed. Some estimates maintain that only 1% or 2% of ingested polyphenols in 95% curcuminoid extract of turmeric is ever absorbed.

A Side By Side Comparison

Maximized Turmeric 46x provides 500mg of CurcuWIN®, a new, highly bioavailable curcuminoid raw material, in each “00” capsule. CurcuWIN® showed a 46 times better absorption rate against 95% curcuminoid extract in a double blind placebo controlled study comparing leading curcuminoid raw materials. This means that 500mg of Maximized Turmeric 46x packs as much power as 23,000mg of 95% standardized extract! WOW! Maximized Turmeric 46x is effectively 19.34 times more bioavailable than any other form of curcuminoids on the market today, and 46 times more bioavailable than even the best 95% standardized extract.

Curcuminoids have traditionally been used in India to relieve digestive disorders and allergic inflammations. They inhibit enzymes that synthesize inflammatory leucotrienes, prostaglandins and

prostaglycins, and inhibited conversion of aflatoxins from the mold *Aspergillus parasiticus* (commonly found on corn and peanuts) to carcinogens in in vitro studies. Similar studies show curcuminoids may inhibit growth of foreign intestinal bacteria, fungi and parasites. Maximized Turmeric 46x is the highest potency curcuminoid product available to provide maximum support for healthy joint, intestinal and liver function.†

Turmeric 46x contains the same powerful formula in a 250mg dose, equivalent to 11,500mg of 95% curcuminoid standardized extract.

BIOPERINE

Version 3.0 now contains bioperine for added absorption. Bioperine is pure piperine extract obtained from black pepper fruits that enhances the bioavailability of herbs and other nutrients through increased absorption.
