CONDITION SPECIFIC INGREDIENTS

L-glutamine.....	700 mg..... *
Calcium butyrate supplying 22mg of Ca.....	200 mg..... *
L-arginine.....	200 mg..... *
Magnesium butyrate supplying 16.5mg of Mg.....	150 mg..... *
CurcuWIN™ Turmeric Extract.....	125 mg..... *
Curcuma longa rhizome extract (20% Curcuminoids)	
ApresFlex® Boswellia serrata gum 20%.....	100 mg..... *
3-acetyl-11-keto-β-boswellic acid standardized extract	
Astragalus root 70% polysaccharides.....	100 mg..... *
standardized extract	
Grape seed 95% polyphenols/40% oligomeric.....	50 mg..... *
proanthocyanidins standardized extract	
Pomegranate whole fruit.....	50 mg..... *
40% ellagic acid std. ext.	
Propionyl-L-carnitine.....	50 mg..... *
Rosemary leaf 5% rosmarinic acid extract.....	50 mg..... *
Ginger root powder certified organic	25 mg..... *
Ginkgo biloba leaf 24% ginkgolavonglycosides.....	25 mg..... *
6% terpene lactones standardized extract	
Green tea leaf 98% polyphenols 80% catechins.....	25 mg..... *
50% epigallocatechin-3-gallate decaffeinated standardized extract	
Orgen-SE® Black mustard seed 0.5%.....	10 mg..... *
Selenium extract certified organic

Vibrant Flora Improved Bowel Support has been designed as a 28 day start to a healthy digestive system. Stress, pathogens, allergies, hormones, and nutritional deficiencies may provide the foundation for digestive dysfunction and damage to intestinal linings. Those linings normally replace themselves every 7 days. Improved Bowel Support is clinically formulated to support normal and efficient restoration of intestinal mucosa, helping to assure the health and overall function of the digestive system.

100 billion probiotics from 8 effective strains provide the core of the Improved Bowel Support formula. They go to work on the special dietary fibers in Improved Bowel Support, converting them to short chain fatty acids. The fatty acids fuel dynamic growth of new cells in a healthy intestinal lining. Improved Bowel Support is your all in-one product to promote regularity and digestive health. It contains ingredients that support intestinal health.

Improved Bowel Support, combined with a good diet and exercise plan, can help improve bowel function and discomfort by addressing the cause on a cellular level.

VIBRANT FLORA PROVIDES

- Fiber
- Probiotics
- Organic Acids
- Amino Acids
- Antioxidants
- Adaptogens for stress management

8.5G OF FIBER

Wheatgrass leaf powder, psyllium, and acacia fibers are fermented by the strains of probiotic bacteria in Improved Bowel Support to generate, short chain fatty acids, a primary fuel for the growth of healthy cells in the intestinal lining.

100 BILLION PROBIOTICS

Such a powerful serving of the right probiotics are often required to support a healthy intestine. The eight strains in Improved Bowel Support are precisely the probiotics identified to deliver a successful outcome.

BUTYRATES

Calcium butyrate and magnesium butyrate are buffered sources of the short chain fatty acid, butyric acid, one of the fatty acids that serve as food for cells lining the colon. It helps new, healthy cells grow and develop quickly, hastening restoration.

AMINO ACIDS

Cell proliferation is further supported by three amino acids, L-glutamine, L-arginine, and Propionyl-L-carnitine, which are integral to the process. L-glutamine and L-arginine serve directly as additional fuel for growing cells. Propionyl-L-carnitine plays a key role in the metabolism of short-chain fatty-acids, including butyrate and propionate, important energy sources for developing intestinal cells.

HIGH ANTIOXIDANT BOTANICALS

AprèsFlex® Boswellia serrata extract, Curcuwin® curcuminoid extract, ginger root, ginkgo biloba, grape seed, green tea, pomegranate and rosemary extracts were carefully selected and combined in order to subdue the production of a wide variety of pro-inflammatory cell-to-cell messengers, and may increase the output of some anti-inflammatory cell messengers. These ingredients scavenge free radicals in their own right, help bind damaged tissue back together, resist tissue breakdown, and may help shrink swollen tissue.

CERTIFIED ORGANIC SELENIUM

Scavenging cells that are part of the natural immune response to inflammation, called macrophages, can ironically exacerbate inflammation as they try to clean up the debris from damaged cells. The element, selenium, is needed by macrophages to control their own pro-inflammatory tendencies as they go about doing their good works.
