

General questions

1. What problems can you identify in this story? Are solutions presented?
2. In what way might this story be relevant in your community?

Further exploration

1. How would a lack of clean water impact your daily routine?
2. The environmental degradation of the sea from raw sewage output contaminates Gaza and Israel's water. What factors have impeded progress in tackling this problem, despite this shared interest and environmental responsibility?
3. Most of the freshwater in Gaza is unsuitable for drinking. Does the international community have a responsibility to help? If, so, what are the challenges?
