

General questions

1. What problems can you identify in this story? Are solutions presented?
2. In what way might this story be relevant in your community?

Further exploration

1. Operating a jumbo aircraft is a huge expense. What are the benefits of this method of improving eye care in the world?
2. People with Strabismus face both physical and psychosocial difficulties. What impact could a surgical correction have on someone's life?
3. Why does Dr. O'Hara feel it is important to impart knowledge to local providers because the work needs to be sustained long after the visiting doctors have left after performing just a few procedures. What are the different aspects of Orbis' approach to try and leave behind sustainable health care for many patients, instead of a few who won the lottery and received care on the airplane?
