

### **General questions**

1. What problems can you identify in this story? Are solutions presented?
2. In what way might this story be relevant in your community?

### **Further exploration**

1. Why do you think Rwanda has put such an emphasis on health care transformation?
2. How does Rwanda's health care model compare to health care in your community?
3. The community health care workers are all volunteers. Do you think a volunteer model would work in your community? Why or why not? What volunteer activities have improve health and well-being in your community?
4. Most of the illnesses identified and prevented by the volunteers are not as common in wealthy countries. Is there another application of this model that would be more relevant to your community?
