

General questions

1. What problems can you identify in this story? Are solutions presented?
2. In what way might this story be relevant in your community?

Further exploration

1. One cause of vaccine hesitancy in the Native community is mistrust of the government. Is the skepticism justified? What are some ways to strengthen trust in government public health systems?
2. Nationwide, indigenous people experienced the highest death rate from COVID-19, nearly twice the rate of white Americans. What could account for that discrepancy? How should that factor into public health decisions?
3. What are some of the factors that go into vaccine allocation? What do you think should be considered or prioritized?
