

BERNDORF BELT TECHNOLOGY

Table Top 110

Berndorf engineers and manufactures highly quality carbon and stainless steel oven bands, in various widths and thicknesses for the baking industry. Through constant development and innovation, Berndorf is able to provide bake oven belts that exceed the everyday stresses of baking and transporting baked and specialty goods. All belts are produced in endless condition ensuring precise tracking and straightness. The uniformly dark and heat absorbent belt surface further ensures high quality output and reliability. Our steel belts and steel belt systems have proven “Continuous Reliability” when utilized in baking, cooling, deep-freezing, steaming, drying and transporting applications.
